### ***Our SNS Learning Approach (Pedagogy)***

*We draw from the learner and teacher-guide and we lead the learner with a collaborative intention and spirit* whenever we share information and plan lessons, activities, or experiences. Each plan states how this drawing-from the learner, guided by the teacher, happens within each chapter of discoveries. Time is always saved to co-develop each activity with the learner. Life-long learning is not a top-down experience; it is a communal experience – a communion between learner and leader !
